2018 RODEO VARIANCE APPLICATION

Association Acronym: IGRA

Variance Date: February 1, 2018

Rodeo Name: World Gay Finals

Rodeo Dates: October 27,28 2018

Rodeo Venue: Diamond T Arena

Rodeo Director: Marcus Hood

VARIANCES REQUESTED:

Arena: Stock: Other:

What is the variance requested?

International Gay Rodeo requests the use of the installed arena laser sights for setting barrel and flag race patterns at the Diamond T Arena. This variance would result in a narrower distance between the first and second barrels than recommended in the current IGRA rules.

What is the benefit of the variance to the rodeo?

The variance would allow for dirt that is more compacted and safer for use by the horses considering the frequent use of the arena for such events that has allowed the facility to distinguish itself as a destination venue for barrel racing. Furthermore it would speed up the rodeo arena transitions and remove the risk of measurement error as the laser sights are permanently mounted to the roof of the facility.

What is your back-up plan if your variance is denied?

In the event this variance is denied then the arena will be manually marked and measured by the arena crew during setup and transitions consistent with the guidelines established by the most current edition of the IGRA rules.

By our signatures below, we certify that this rodeo variance has been approved in accordance with our internal association policies and procedures and we have determined it to be accurate and acceptable for our business planning purposes.
